Confirmation #1215

weight of sheet metal and rubber matt so that it is easily adaptable to dealing with almost all nuisance animal.

0069 5. My invention allows the sheet metal surface and the mechanical parts of the unit to be mounted separately to deem it usable in many applications, such as mounting on a wall, garbage can lid, to deal with nuisances specific to that problem, or at ground level to deal with crawling predators such as alligators, that would not be possible otherwise.
